## PROFESSIONAL SUMMARY

Computer Science fourth-year student specializing in backend development using Node.js and Laravel, with experience building secure, scalable web applications featuring REST APIs, multi-role authentication, recommendation systems, and PostgreSQL/Redis data layers. Seeking a backend development internship.

## EDUCATION

Bachelor of Science in Computer Science | University of Makati | 2022 – Current

## PROJECTS

**WorkAble** – A Job Recommender System for PWD Users | Laravel, PHP, PostgreSQL | 2025

- Developed a backend-driven job-matching platform with a multi-role user system to support accessible and verified recruitment workflows using Laravel MVC.
- Implemented RESTful APIs and middleware-based authentication and authorization, powering job postings, applications, profiles, and notifications with PostgreSQL and Redis caching.

**BaybayInscribe** - AI-powered Baybayin learning platform | Next.js (React), TypeScript, PostgreSQL/Drizzle, Better Auth, JWT, OAuth (Google/Facebook) | 2024

- Built a secure auth layer with email/OAuth login and password resets to streamline user onboarding and retention (Better Auth, JWT, Nodemailer)
- Implemented user profile management and role-based admin controls that gate content and admin workflows, improving safety and governance for the learning platform (PostgreSQL/Drizzle, Next.js API routes).
